

3rd Grade Required Summer Work

Dear 3rd Graders,

While you are enjoying your summer break, I am providing you with some reading and math work that will help you stay sharp and ready for 3rd grade in September. You are required to read Freckle Juice by Judy Blume. After you read the book, you will complete the book report packet provided. It can also be downloaded off of my school website. Take your time and do your best work. When you return to school in September, you will share your packet with the class. After discussing the story together, you will also take a quiz on the book. If you read the book early in the summer, you may want to reread it shortly before returning to school.

In addition to reading Freckle Juice you must read two nonfiction stories of your choice from the Raz Kids website. After reading the story, please take the quiz that is provided. Although you are required to read only two stories from this website, feel free to enjoy some of the other stories throughout the summer and take the quiz if you wish. I love checking in to see how much you're reading.

Finally, you have been introduced to Xtramath.org. On this website you are able to practice addition and subtraction facts. Please visit this site weekly in order to help you memorize your facts.

Your username and password for the Raz Kids and Xtramath websites are the same you used during second grade. See the page attached for directions on how to access each website. If you have any trouble signing in during the summer, please feel free to email me with any questions. Enjoy reading and have a wonderful summer!

Sincerely,

Mrs. Brady

Website - www.raz-kids.com

1. Click on Kids Login
2. Teacher Username – **mbradysg3**
3. Click on your child's name
4. Enter password _____
5. Click on Reading (top left hand corner)
6. Click on Reading Room and then Leveled Books
7. Click on a story. Enjoy!
8. Take quiz
