

Sea Girt Goes High-Tech to Reduce COVID-19 Exposure

SGES to use an online health screening application to monitor individuals that are symptomatic or have been exposed to COVID-19.

SGES is taking many new steps to ensure a safe environment for students and staff. One of these steps is to identify symptomatic individuals before they enter the building.

To make this possible, SGES is activating a “Daily Health Screening” feature in the OnCourse Connect portal for parents and guardians.

Each morning **before** school, guardians must log into OnCourse from a computer or smartphone to complete a quick health screening of their children. If they receive a green “Approved” indicator, their student may attend in-person instruction. If they receive a red “Not Approved” indicator, the district asks that the student **not** report to school and contact the nurse for next steps.

Teachers, administrators, and school staff members will also complete this health screening each day before entering campus buildings or transportation.

With this screening system in place, we will have a fast and confidential way to monitor symptomatic/exposed households and help students protect themselves and their peers. However, for this system to be successful, every student and guardian must participate consistently and honestly.

Daily Health Screening for Guardians

The Daily Health Screening application allows guardians to monitor the health symptoms of their children. This guide provides step-by-step instructions.

1

Upon logging into OnCourse Connect you will automatically see the Health Screening form (shown below.) Here you have the option to complete or skip the screening form.

If you choose to complete the form, you'll need to:

1. Review the **Symptoms** and **Exposure** forms with your child and check any boxes that apply.
2. Check the box next to the **confirmation statement** (“I confirm that my...”) to activate the Submit button.
3. Press the **Submit** button.

*If you have multiple children in the district, you will automatically be taken to a Health Screening form for the second child.

Oncourse University
Health Screening - Ferguson, Bernadette
High School

Parents/Guardians: Please complete this short health screening each morning before your child leaves for school. This form will need to be completed for each student in the district.

Symptoms

- Temperature 100 degrees Fahrenheit or higher when taken by mouth.
- Sore Throat.
- New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Diarrhea, vomiting, or abdominal pain.
- New onset of severe headache, especially with a fever.
- New loss of taste or smell.

Exposure

- Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19.
- Had close contact (within 6 feet of an infected person for at least 15 minutes) with person under quarantine for possible exposure to SARS-CoV-2
- Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as described in the Community Mitigation Framework

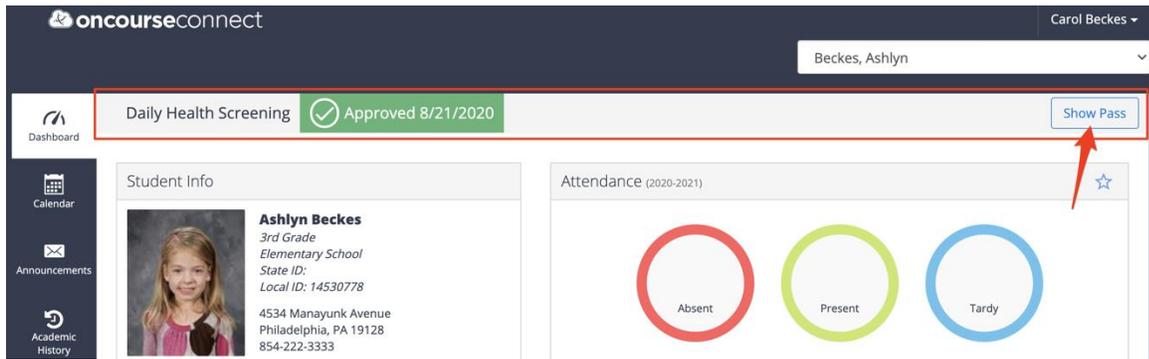

I confirm that my answers to all of the above are true and accurate (required).
